INTRODUCTION

Arcade Chain is a modern, comprehensive, decentralised cryptocurrency platform on Binance smart chain. It works on Binance smart chain but it will also be connected to others and become a multi-chain ecosystem. Arcade Chain is a high-performance entity that offers a variety of services on a single platform.

Arcade Chain is creating a completely new ecosystem where people from all over the world can participate with low transaction fees, enabling a highly-liberating, strategic, low-risk, and seamless staking experience in a truly decentralised way. Arcade Chain's main focus will be around PvP (player-versus-players) and classic arcade games in the form of dead matches where multiple players start and only one wins. The winner will take most of the entry fees from other players as a reward and the remaining portion will be distributed to ACT token stakers.

We will offer a lottery system wherein no human will act as intermediary. The system is secure, and the software and transactions have been shown to be fair and reliable.

Arcade Chain is not only an emerging platform built on the blockchain; it also has transparency and staking features that we believe are crucial for the long-term feasibility and decentralisation.

Users will be able to earn Arcade Chain yield by staking. We are changing the market with a decentralized global financial system that is more transparent, accessible, and fair.

This technology will facilitate a financial revolution that will leave everyone more financially connected, empowered, and enabled. In short, Arcade Chain provides many facilities under one umbrella.

OUR MISSION

Our goal is to merge gaming with cryptocurrency by establishing an ecosystem that enables players to transact in a stable coin and allows gamers and investors to earn money while immersed in a unique environment.

Both game fees and rewards and staking rewards will be in a stable coin allowing users to avoid crypto price swings.

By creating our own deflationary Arcade Chain Token, we hope to tear down boundaries in the gaming industry by allowing players to stake inside the game's ecosystem, and use the Arcade Chain Token to participate in platform profits.

VISION

We envision a world where crypto-enabled gaming is carried out with a safe, well-known, stable coin. This stability will offer players both confidence and convenience.

Additionally, investors, can stack our Arcade Chain Token (ACT) in order to participate in a share of platform profits. Again, the profits will be distributed in a stable coin. Moreover five percent of profits will be dedicated to the market purchase and subsequent burning of ACT tokens.

The aim of this strategy is to decrease the token's supply and thereby positively affect its market price.

OUR CORE VALUES

Community

We want our community to believe in and support our project. We will instil this confidence by disseminating regular updates through Arcade Chain community channels. We aim to take our audience on a trip from idea to completion.

Transparency

For far too long, cryptocurrency projects have gotten away with unscrupulous tactics and secret development teams. With crystal-clear objectives, regular development updates, and trackable accounts displaying what we spend through our development wallet, we aim to blow away the fog of obfuscation.

Stability

We want to provide a stable developing platform that incentives users to keep the token and earn incentives using the unique, fresh tokenomics we embedded into our smart contract. From the start, each of the core development team's wallet addresses will be accessible on the website, allowing anybody to view their transactions at any time.

Fairness

Our unique ecosystem, will result in the fairest, most transparent economy crypto has ever seen. When you buy anything in the network, you know exactly what you're getting, and it has real-world value. Our stacking system has no lock-in mechanism - you can withdraw all tokens at any time.

OUR PLATFORM'S PURPOSE

The First Easy To Use Gaming Platform

Arcade Chain is the world's first stable coin-enabled gaming platform. Our competitors focus on selling their own tokens, but we focus on creating the first-class player experience.

Stable Passive Income

By stacking ACT Token all investors will participate in the platform profits. In addition, the deflationary nature of ACT provides additional incentive to hold the token.

Building Community through NFTs

All investors holding a genesis token will be able to mint its copies and distribute them among their peer network. Genesis token holders will get a guaranteed portion of profits from their game fees and the player will benefit from increased odds in games of chance

ARCADE CHAIN STAKING

We built a fair, easily-understood stacking system. No hidden or obscure rules will be in place, and the stacking rewards are calculated the following flow:

- All proceeds from accounting period are calculated.
- All expenses (server fees and other operational costs) are subtracted.
- Five percent is set aside for market purchase and burning of ACT token.
- Genesis tokens guaranteed fees calculated per player per transaction, subtracted from the pool and awarded to genesis token holder.
- The rest of the pool distributed to all stakers, weighed on the ACT's stacked value.

ARCADE CHAIN NFT

Arcade Chain Non-Fungible Tokens (NFTs) are one-of-a-kind, transferable assets created on the blockchain. They come in two varieties: genesis token and minted copies of a specific genesis token. Their main purpose is to build community while giving holders tangible benefits.

Genesis token holders will be able to distribute minted copies of the tokens among their friends. In return, the holders will be awarded a percentage of profits from the copy-holder gaming fees.

In addition the minted token holders will benefit from increased odds in games of fortune. Games of skill, however, will be unaffected; no competitive advantage will be granted to the players.

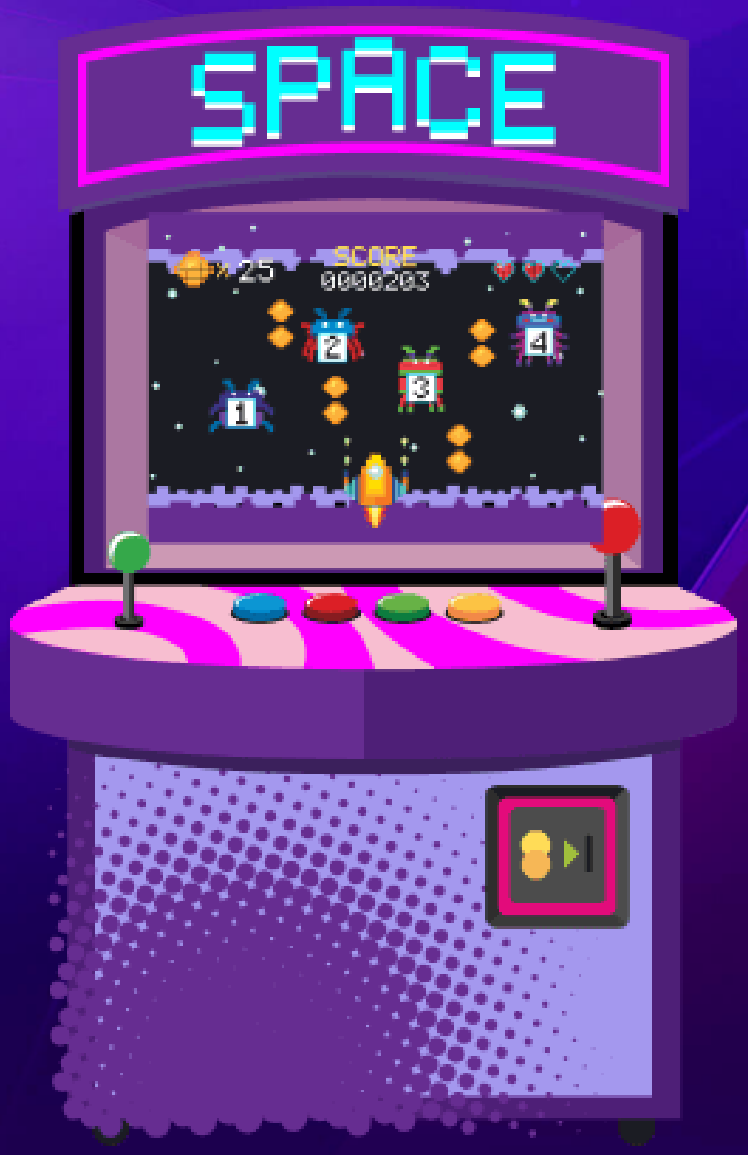
TOKEN PRE-SALE

The Arcade Chain will hold a single Arcade Chain Token (ACT) pre-sale.

The pre-sale will be publicly available and the price set to $0.01 per ACT (with the CEX listing price set to $0.10). This round is capped at $5000 per user and 5% of token supply for the event.

Tokens reserved in pre-sale will be distributed using the following schedule:

- 10% unlocked at TGE (token generation event)
- 2 % per week thereafter
- No cliff



ARCADE CHAIN GAMES

Arcade Chain will build many games to keep the players entertained.

We will start with arcade classics like slot, coin drop or claw machines and shortly afterward we'll add a unique binary lottery.

Our development team will design a player-versus-player platform with dead matches where the winner will collect other players' fees.

Most games will be playable in the browser but we'll work hard to give them cross-platform capability and enable players to compete on other devices.

With the more advanced games, we're going to build leagues and in-game betting to further enhance entertainment for players and revenue source for our stackers.

TOKEN DETAILS

Name	Arcade Chain Token
Symbol	ACT
Platform	Binance Smart Chain
Type	BEP-20
Total Supply	1,000,000,000
